NAVY DEPT. TAKES OVER SHAY PROPERT Extensive Improvements Being Made By Officials.

The naval department is beginning to spend some of the \$1,250,000 ap-propriated for the development of the submarine base on the Thames river. When the committee of citizens in order to remove the complaint of the officers and men in the base that the odors from the Shay Fertilizing plant were unbearable and would result in the removal of the base unless suppressed, made a lease of the premises for a term of two years, it was with the expectation that the needs with the expectation that the needs of the base would soon demand the taking over of the extre place for

the use of the navy.

This expectation seems likely to be realized. A short time ago the naval authorities made an offer to the committee to lease the Shay property from Sept. 1 to Jan. 1, 1918, with the privilege of extension of the lease. The rental price was to be the same as the committee is paying to the Shay committee. pany. The proposition has been accepted and the navy department has already entered upon the premises and has begun to make extensive im-provements. The foundation for a large building has been laid in concrete and many thousands of dollars worth of building material has been carted to the vicinity. This activity is taken as a certain indication that the government will acquire title to the Shay property as soon as it can. In the appropriation of \$1,250,000 there was no item covering the purchase of the land. The price said to have been agreed upon by Secretary Daniels and the naval officials for the land and building is \$30,000 and it is believed that the next appropriation passed by congress for the use of the
